

Chris Carr Report

Not much in the way of case work however Wednesday this week I will be attending a meeting to plan a cycling event across the whole borough that I believe I have mentioned before. It will be looking to get challenge residents to cycle to locations around the area across a number of weeks and would involve locations in Kimberley. I can provide more details if councillors are interested.

Andy Cooper Report

At a Labour Group meeting 9th July I informed members that Main St, Kimberley would be closed for at least 10 weeks commencing 29th July owing to the installation of a new gas pipeline. I detailed the problems that the closure would cause to businesses and residents. Subsequently, I asked if the council could waive all parking charges during this period. I'm pleased to report that this has been confirmed today (19th) by Broxtowe Borough Council.

I am still involved with resident's problems detailed at last KTC meeting. Fairgrove and Notts CC

After many requests for storm drains to be cleared I'm pleased to report that a programme appears to have been implemented.

Will Mee Report

I have recently been creating liaison between cadent and the council via email, we have been told that car parking charges will be waived for the duration of the works after we raised it with the council.

I have also been liaising with brewery site residents to get the council to support them with their concerns. We also plan to have a ward walk with Alex Norris MP at some stage around the brewery site so he can see first-hand the issues.

We still have some outstanding issues with county in regards to road resurfacing, for example Noel street, which is like one giant pothole. We have made the new MP Alex Norris aware of this. I am still awaiting a response from Neil Clarke on the Bus situation, I am happy to see in councillor Owen's report that it is now 'under review' and I would like to ask how long that will take, as well as what integrated ticketing options have been reviewed with the tram at phoenix park and any other local public transport.
